Meeting of the IMC Task Force on Energy Renovation in Mediterranean Buildings

Tuesday 30th of April 2024 – 09.30-11.30 CET – Online Meeting

Introduction

Since October 2023, the Generalitat de Catalunya has put forward a new area of collaboration under the CPMR-IMC Task Force on Energy Renovation in Mediterranean Buildings: the decarbonisation of housing. Since then, a series of initiatives, including a questionnaire and bilateral meetings with member regions, have been undertaken to assess each region's progress on this topic and to pinpoint potential sub-themes ripe for collaborative efforts among the Intermediterranean Commission's member within the Task Force.

This meeting marks an opportunity to discuss and agree on the priority actions proposed during the last online IMC Political Bureau meeting on March 6th, specifically regarding the Task Force’s new focus area. This Task Force meeting aims to go deeper in the update of the Action Plan within the Water and Energy Working Group, which hosts the Task Force, and to open the debate with interested IMC members.

Furthermore, as the coordinator of the Task Force, the Generalitat de Catalunya will introduce a proposal for a unified methodology concerning the primary line of action that member regions will undertake in the ensuing months. This involves conducting an assessment of the state of public housing stock based on mutually agreed criteria.

Register here: CPMR Intermediterranean Commission - Task Force on Energy Renovation in Mediterranean Buildings before the 26th of April
